- ⇒ 10th March
- ⇒ 7th April
- ⇒ 9th June
- ⇒ 1st July
- ⇒ 11th August
- ⇒ 1st September

All members are welcome at meetings

The Liebe Group would like to acknowledge and thank the Department of Agriculture and Food WA, the Australian Government, the Grains Research and Development Corporation and Farm Weekly for their valued support.

LIEBE GROUP'S SOIL BIOLOGY TRIAL ATTRACTS RESEARCHERS FROM NATIONWIDE!

Thursday the 6th of February saw 25 people head out to Liebe Group member Stuart McAlpine's property west of Buntine to link farmers and researchers to create better outcomes from soil biology research.

The discussion helped not only helped the researchers in understanding what farmers are wanting to know more about in regards to soil biology by also farmers were able to learn about where we are in understanding and how far we need to go.

The soil biology trial on the long term site has been running for 10 years now and continues to open up possibilities for new research. From the meeting Liebe Group plan to continue to be involved in building the understanding around soil biology, what impact it has on our farming systems and how to ensure sustainability in agriculture.
